

## TATTOO AFTERCARE INSTRUCTIONS

Your artist applies TATTOO SPRAY® after you have finished your tattoo session. It shields your tattoo with a clear barrier, starting the healing right and keeping it safe overnight.

### Why It's Great:

- Breathable, so your skin heals well.
- No mess on clothes or sheets.
- Keeps moisture just right.
- Easy to see your tattoo through the clear layer.
- Hygienic & promotes natural healing

### Daily Care Made Simple:

#### 1. The Morning After Wash:

- **Clean:** Wash the area gently. Use warm water and anti-bacterial soap to wash your tattoo.
- **Dry:** Pat dry thoroughly with a paper towel. No rubbing!

#### 2. Reapply TATTOO SPRAY®:

- **Spray:** Vigorously shake well and spray evenly from about 10-15cm away.
- **Dry:** Let it air dry for a minute. Apply a second spray. You're protected again!
- **Repeat:** Do this daily for up to 5 days.

### Keep in Mind:

- Don't use on your face or open wounds.
- Use for up to 5 days, then switch to a tattoo balm or equivalent.

### General Tips:

- Don't scratch or pick at your tattoo.
- Avoid long baths, swimming, and direct sun at first.
- Always use SPF 50 sunscreen after it heals.
- Always wash your hands before touching your tattoo.

### TATTOO SPRAY® vs. Old Methods:

- No irritation like you might get with clingfilm or adhesive films.
- No messy leaks or stains.
- It's quick, clean, and keeps your healing on track.

Choosing TATTOO SPRAY® means a better healing experience for your tattoo, keeping it clean, comfortable, and perfectly healing. Questions? Talk to your tattoo artist for personalised advice.
